

# DOMINO

Listy k vytištění

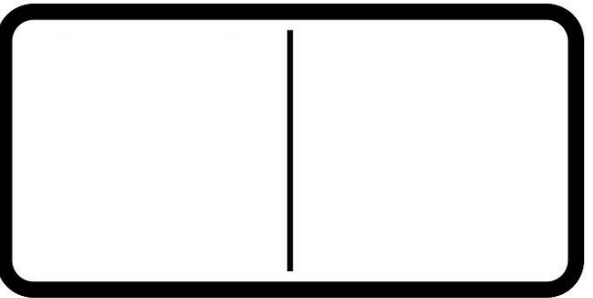

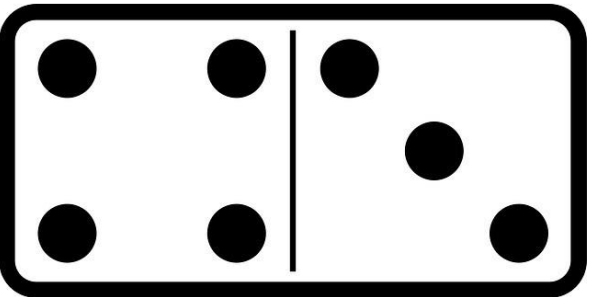

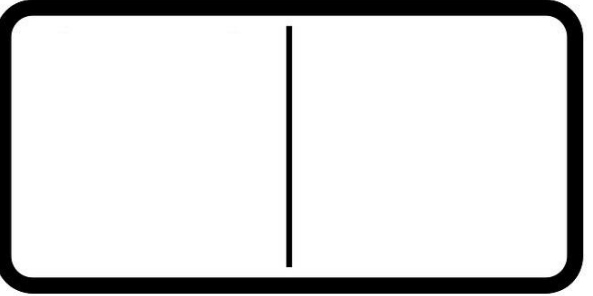

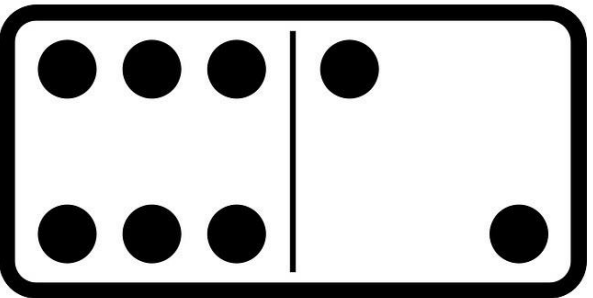

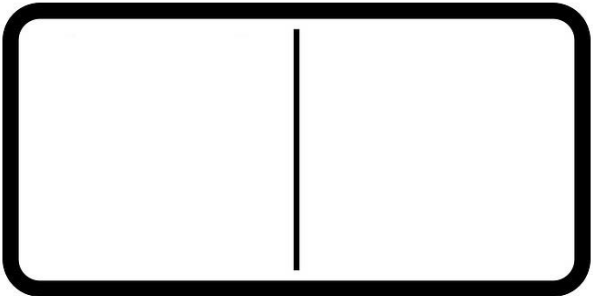

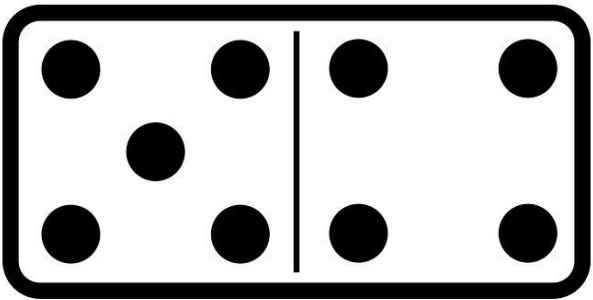

*(pro dlouhodobější použitelnost vhodné k zalaminování)*

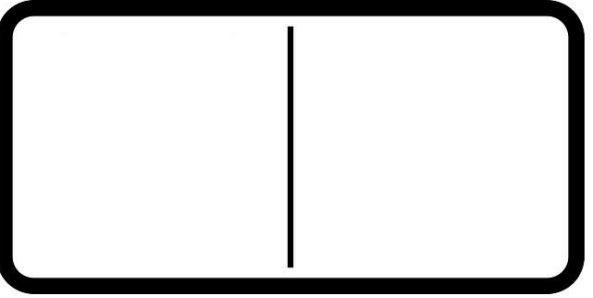

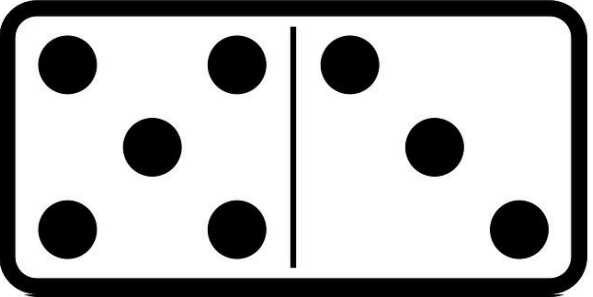

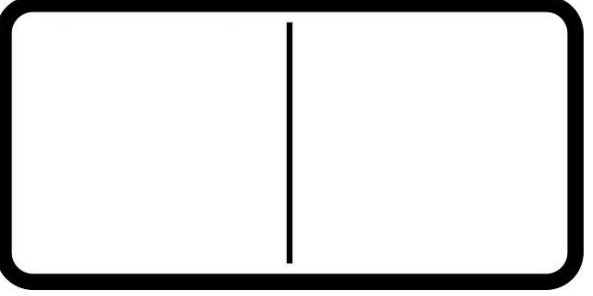

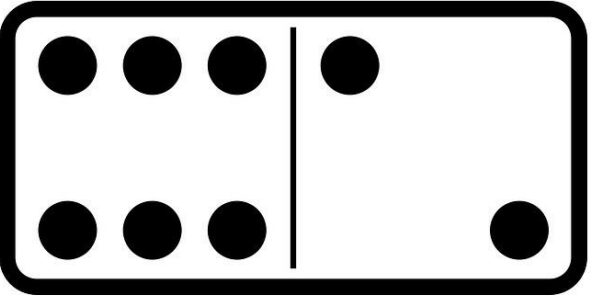

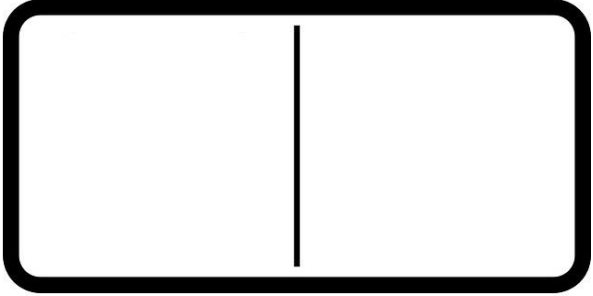

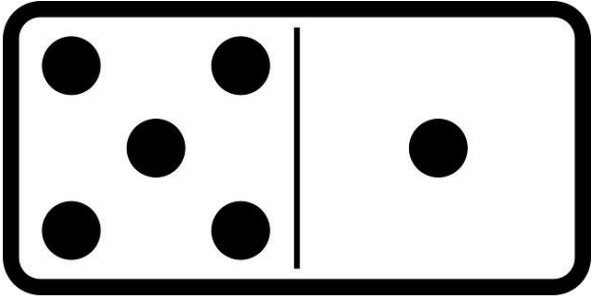

Děti počítají a doplňují stejný počet nebo pokračující řadu pomocí nejrůznějších drobných tvarů (např. kamínků, knoflíků, fazolí, apod).

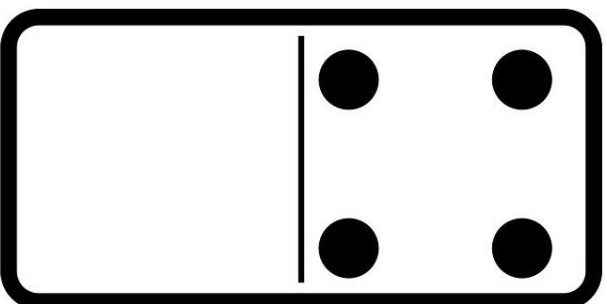

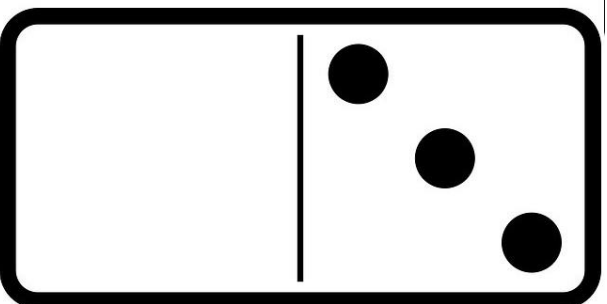

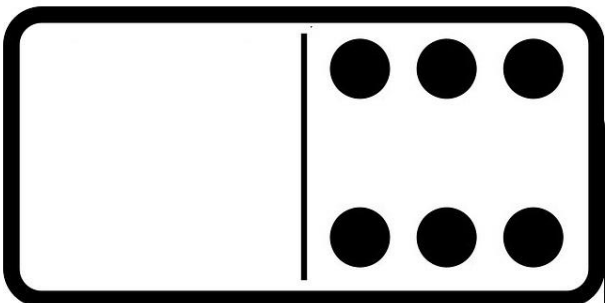

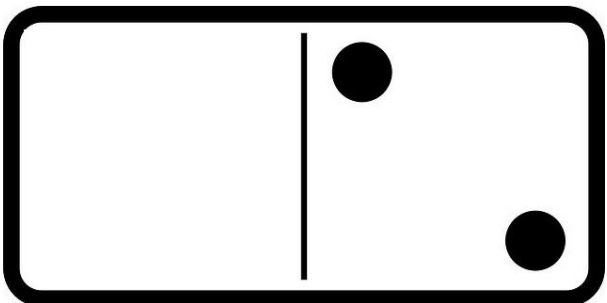

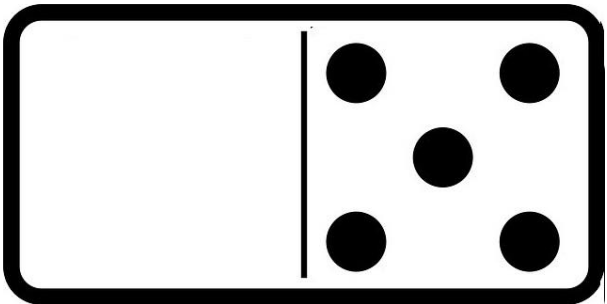

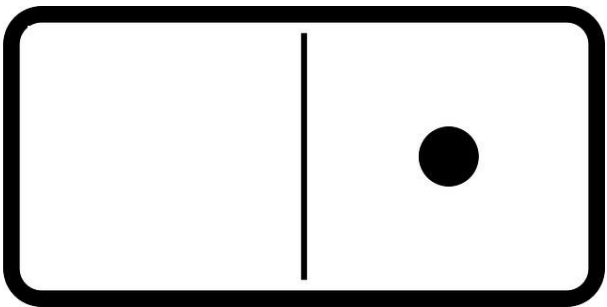

## **Procvičují si tak:**

- matematické dovednosti – porovnávání množství, počtu
- logické myšlení
- paměť
- vizuomotorickou koordinaci
- poznávací a kombinační schopnosti
- jemnou motoriku prstů při uchopování drobných tvarů
- špetkový úchop
- ale i barvy (v případě barevných tvarů)

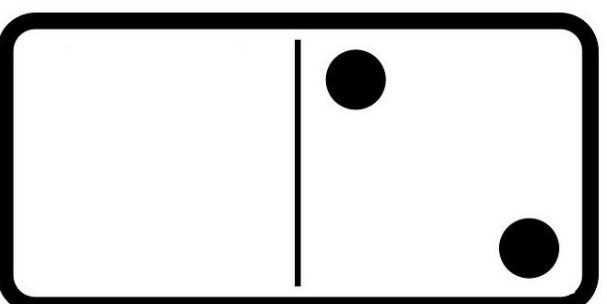

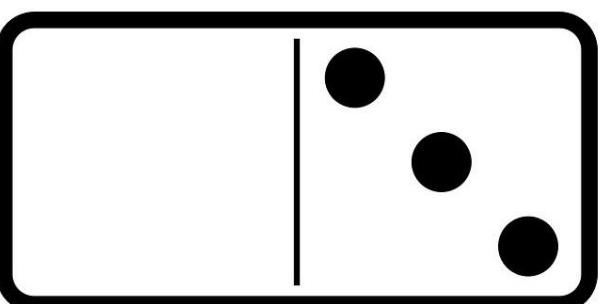

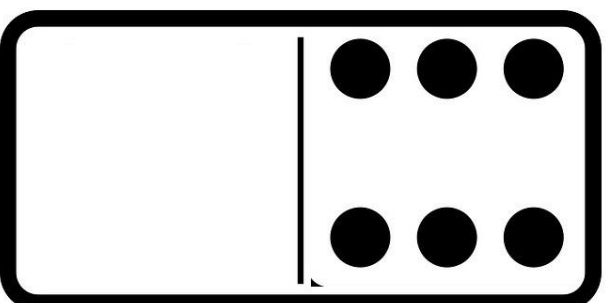

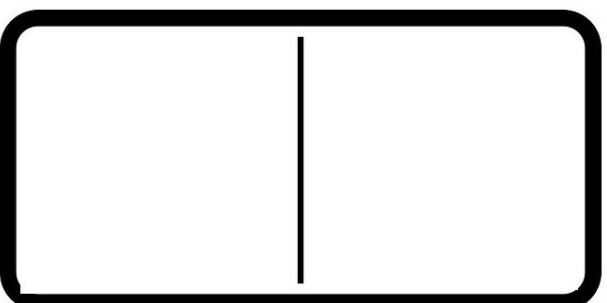

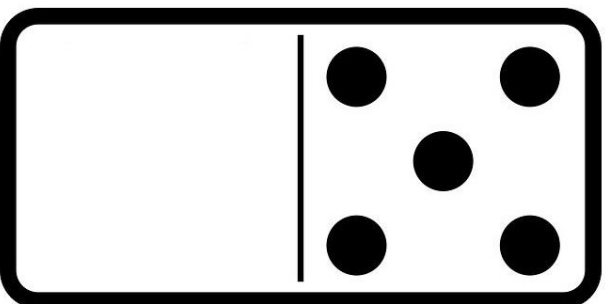

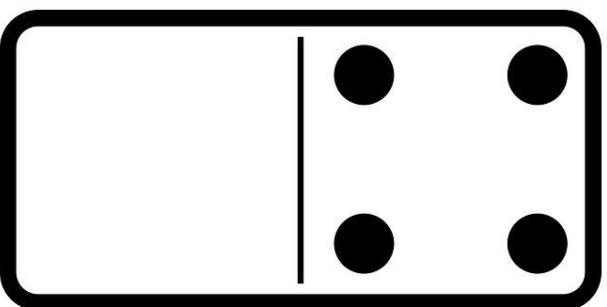

STEJNÉ DVOJICE

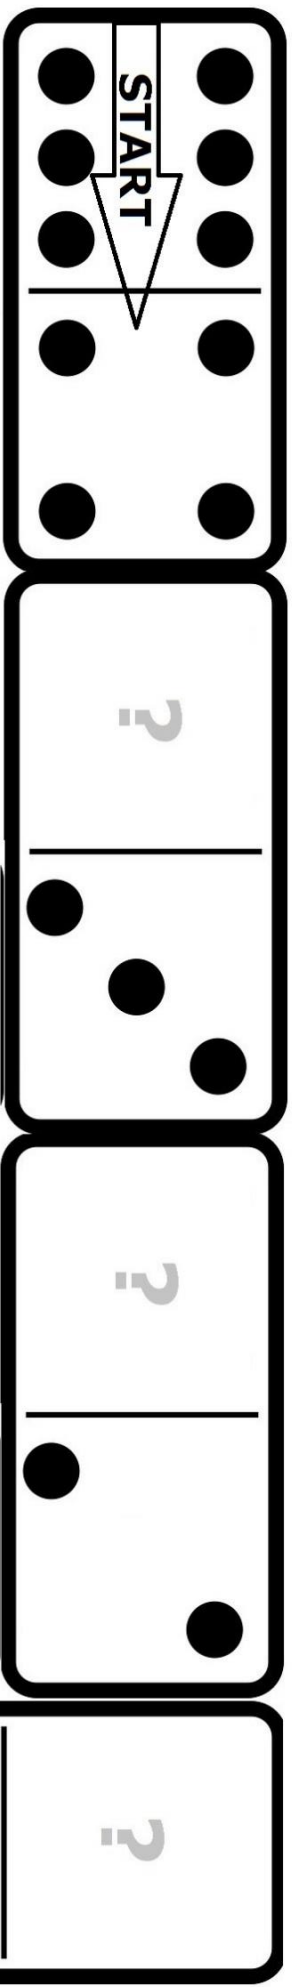

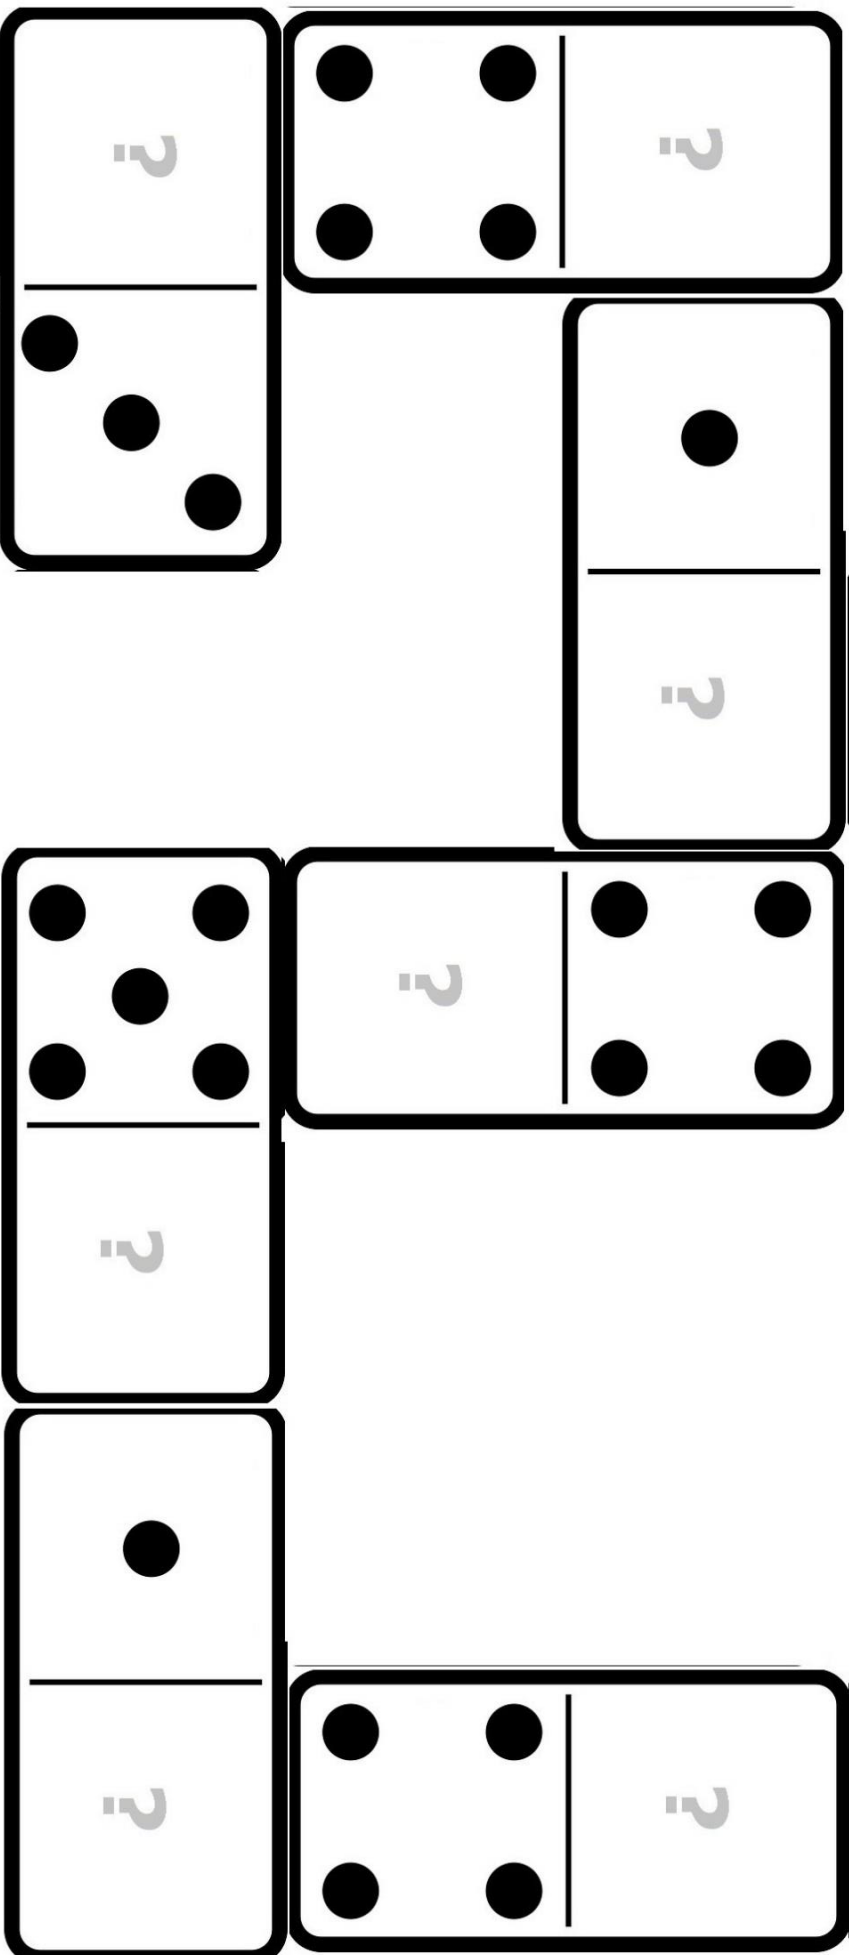

DOPLŇ STEJNÝ POČET
