

# dušičkové/halloweenské sčítání do 20 s přechodem přes desítku

Vhodné jako rozcvička na úvod hodiny matematiky nebo procvičování sčítání.

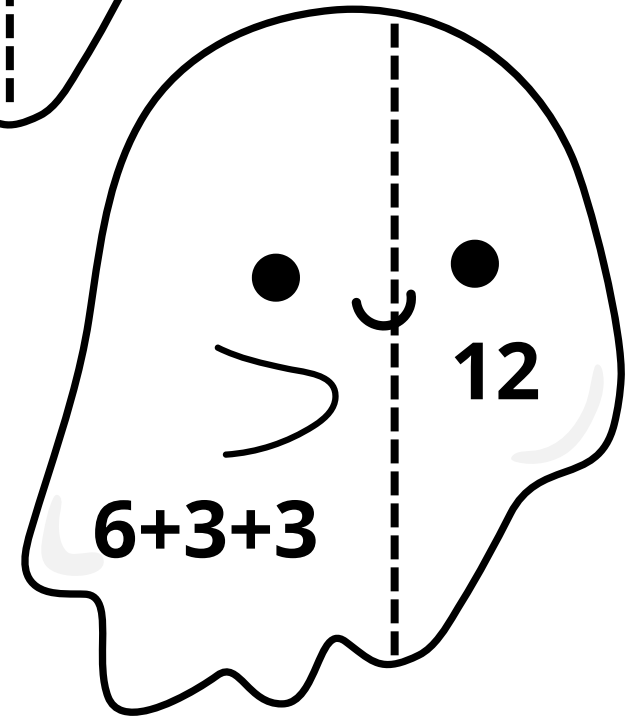

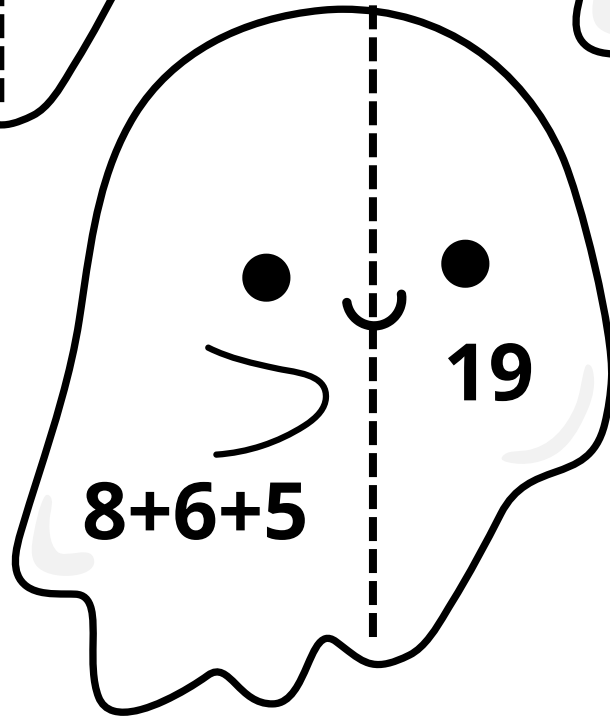

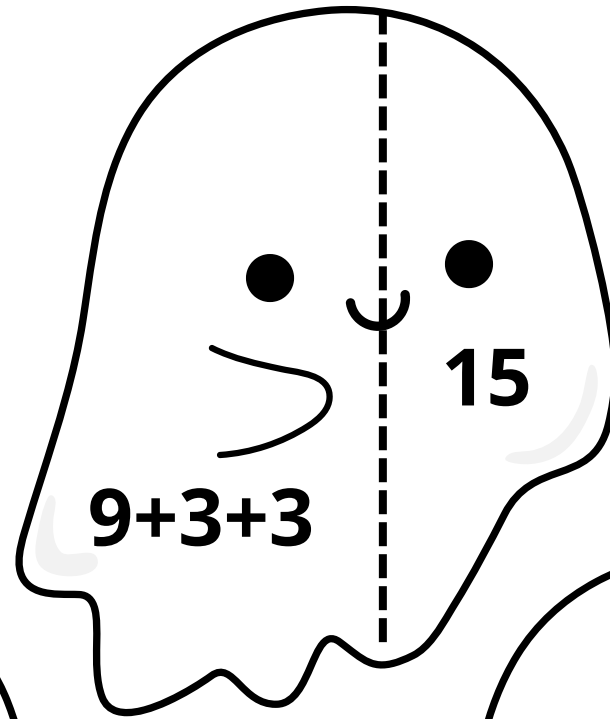

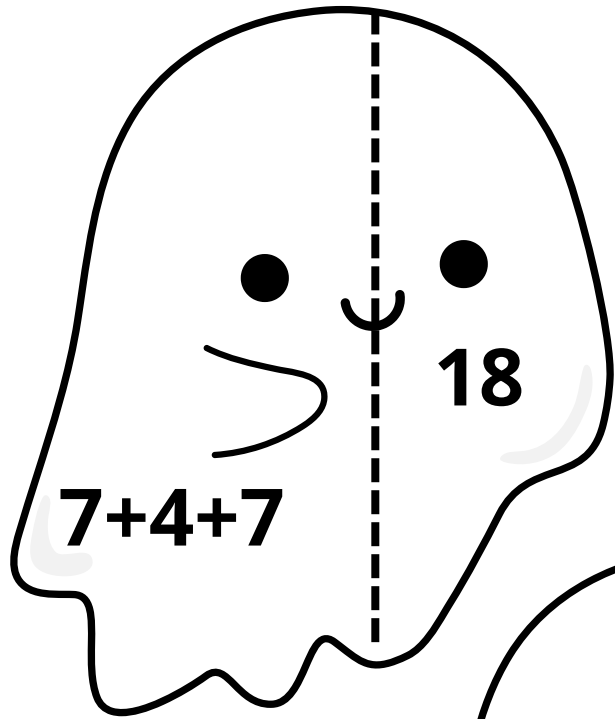

**Soubor obsahuje dohromady 32 duchů rozdělených na dvě části- příklad a výsledek. Cílem je rozstříhané části poskládat znovu správně k sobě jako příklad a výsledek. Jedná se o klasické sčítání do 20 s přechodem přes 10, ale zábavnou tematickou formou.**

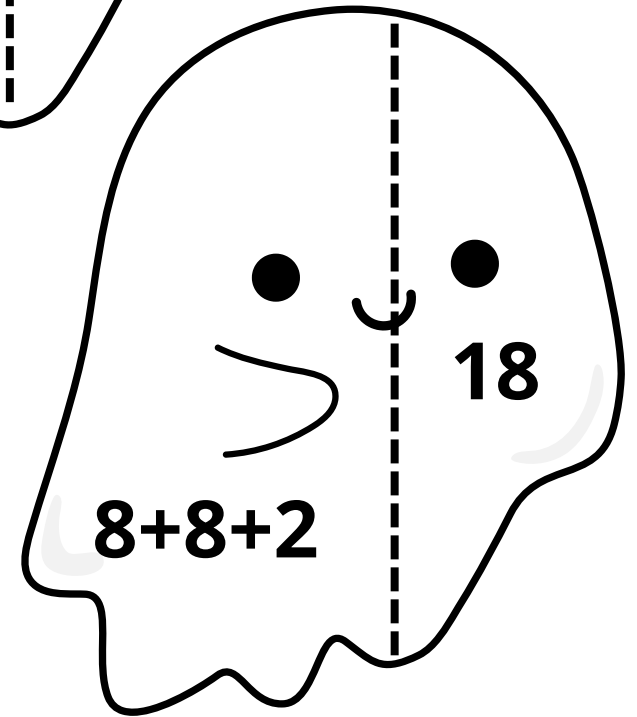

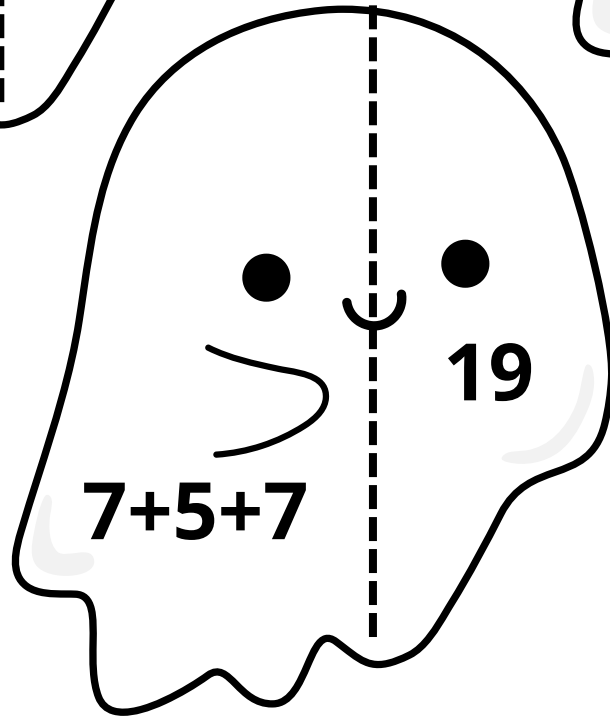

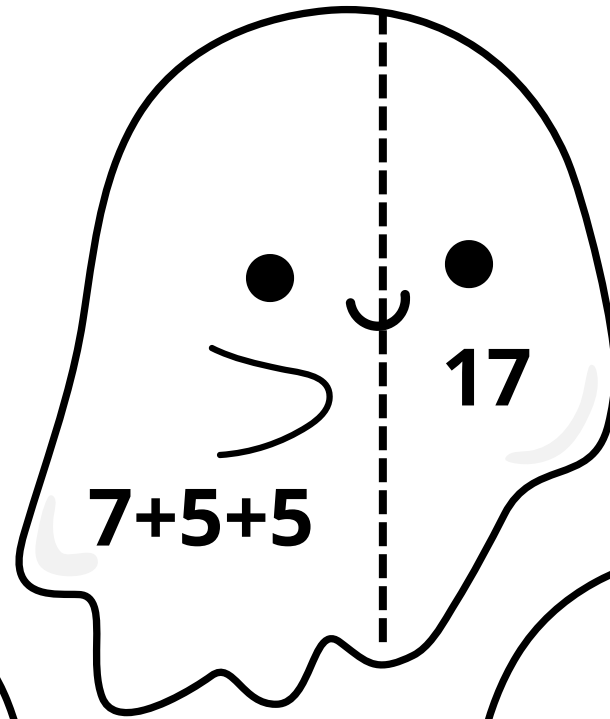

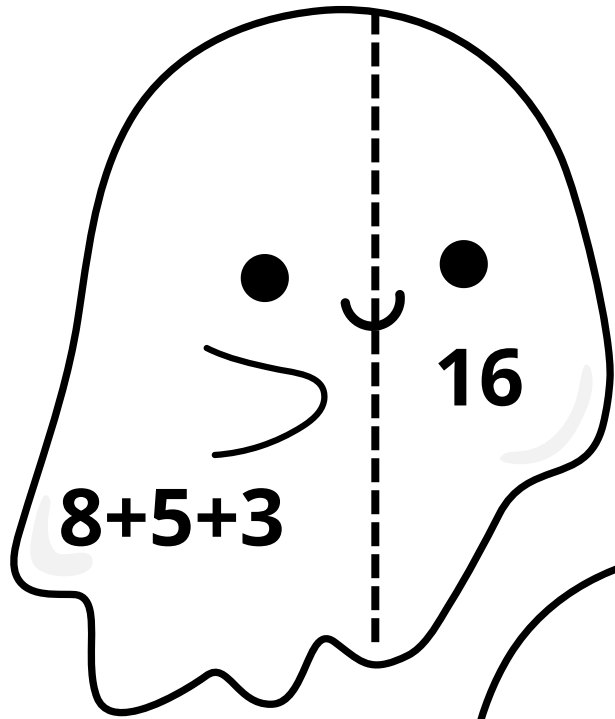

**Návod: Vytiskni a rozstříhej duchy na dvě části. Pro opakované použití je vhodné zalaminovat.**

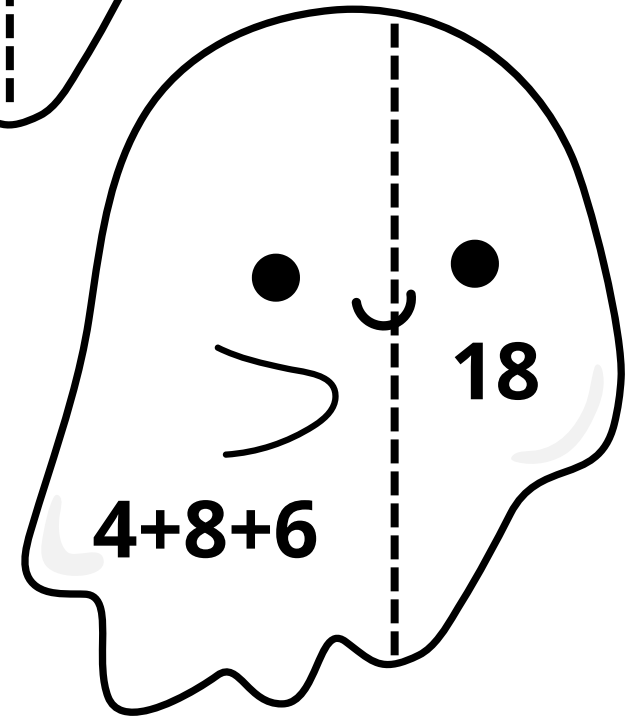

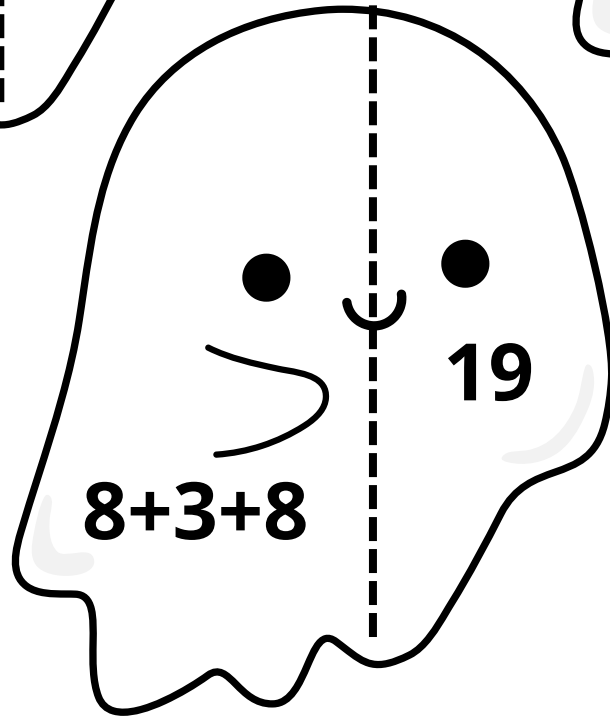

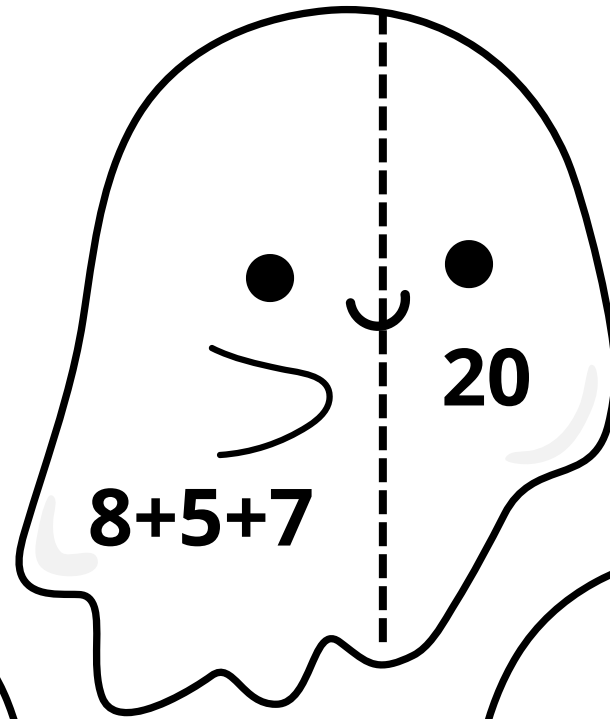

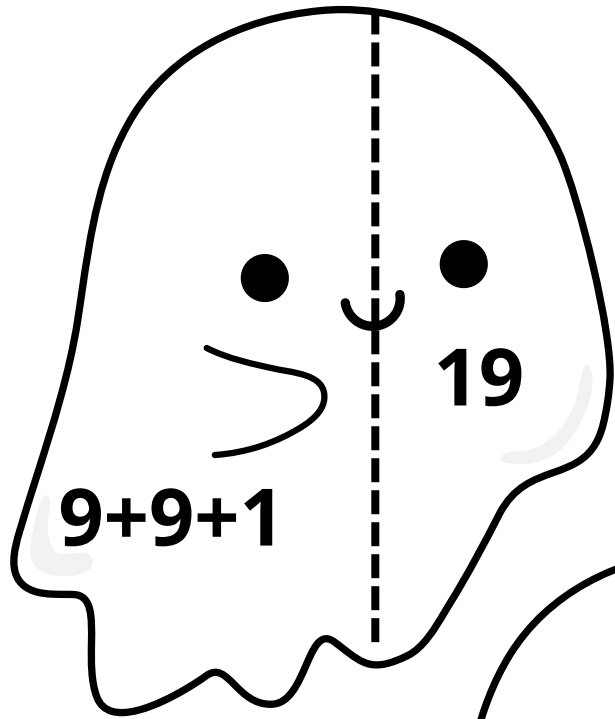

**Použití:**

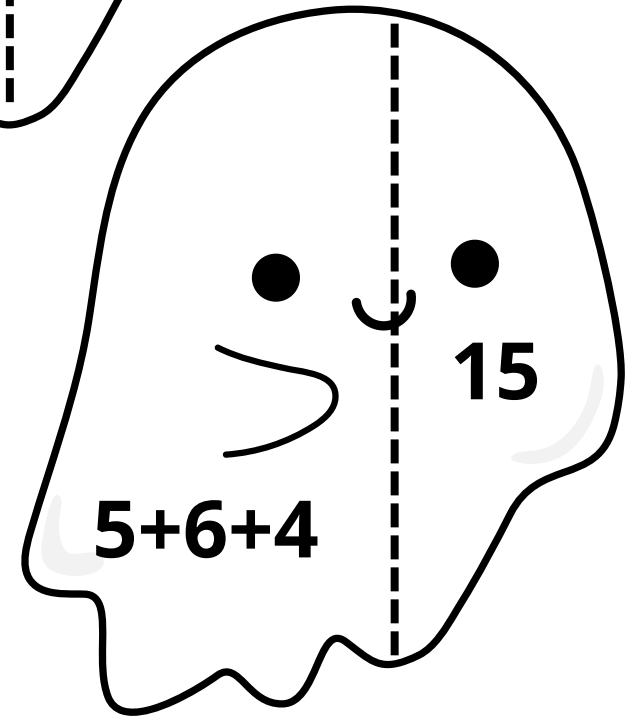

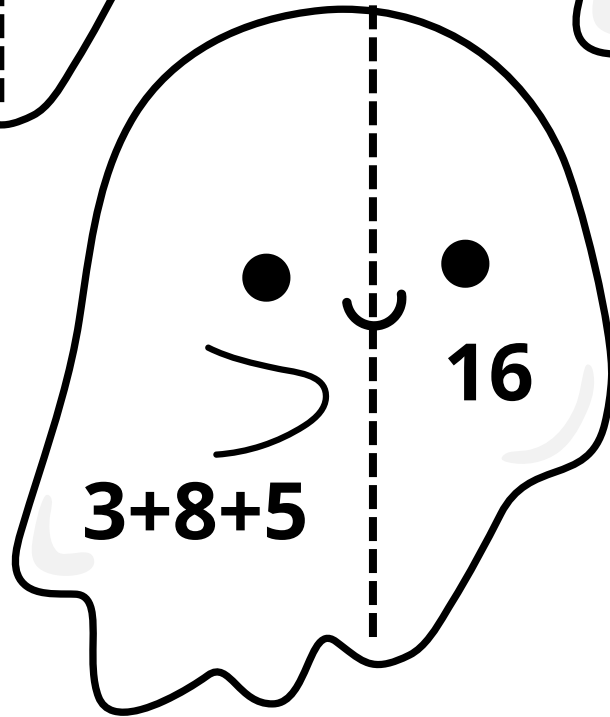

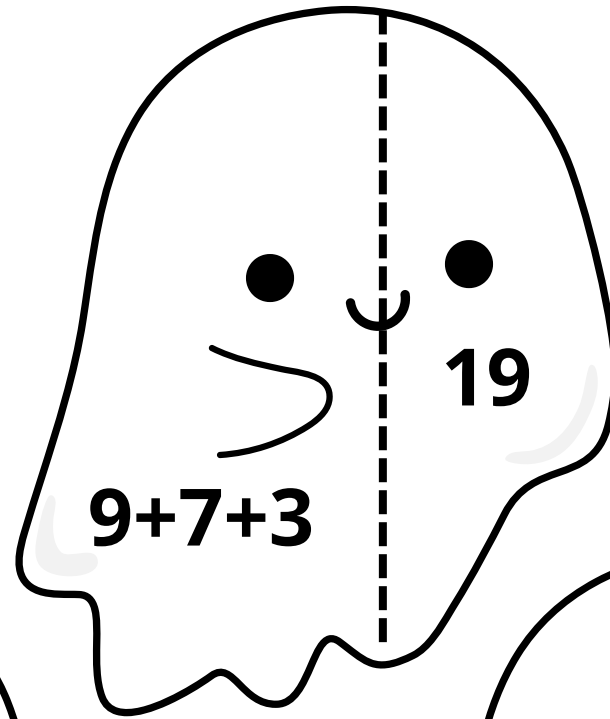

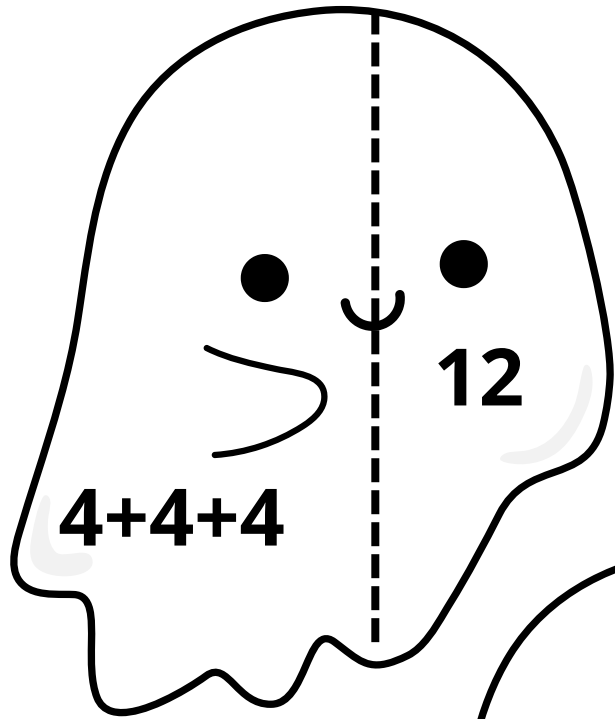

- **Po třídě rozmístit všechny části a nechat děti hledat dvojice, které k sobě patří.**
- **Každý žák/skupina dostane jednu půlku a musí najít druhou.**

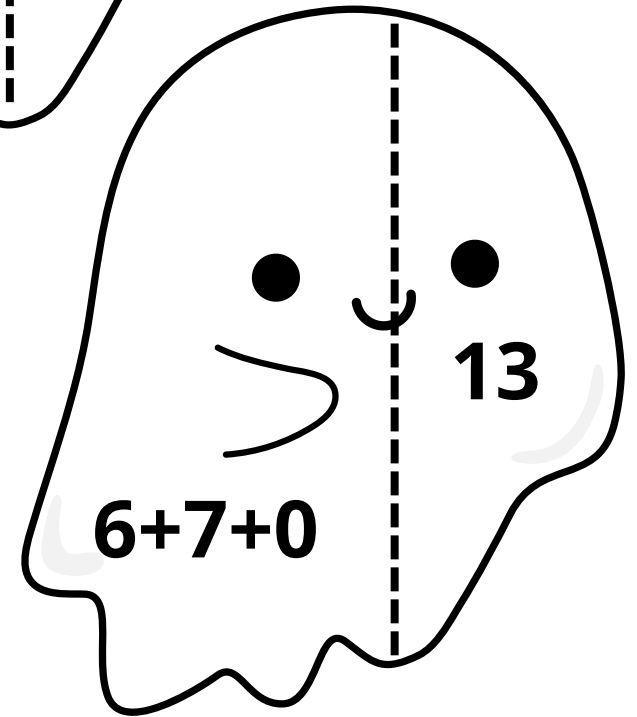

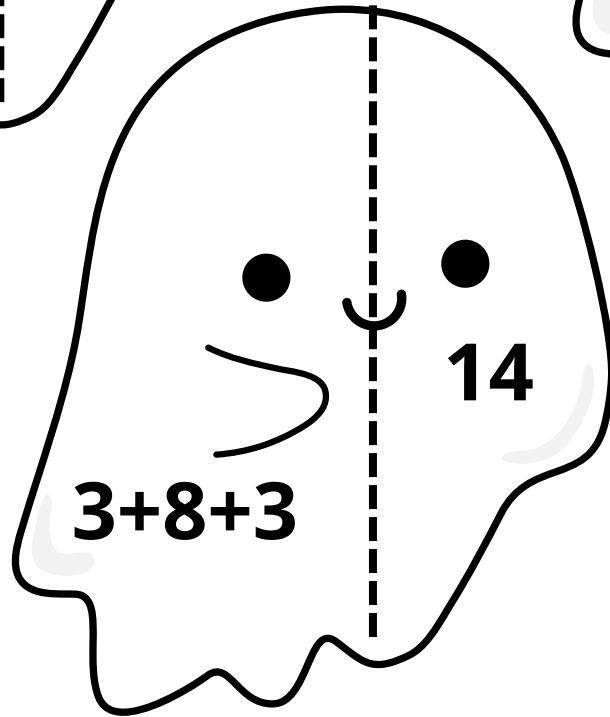

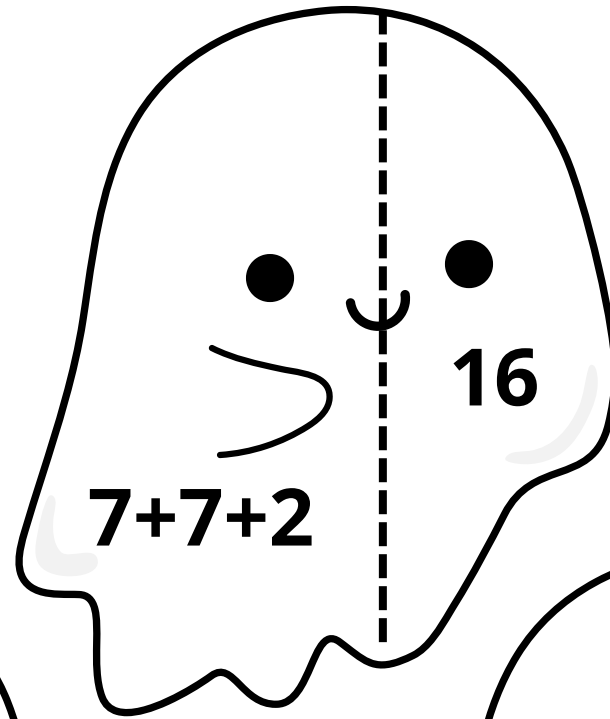

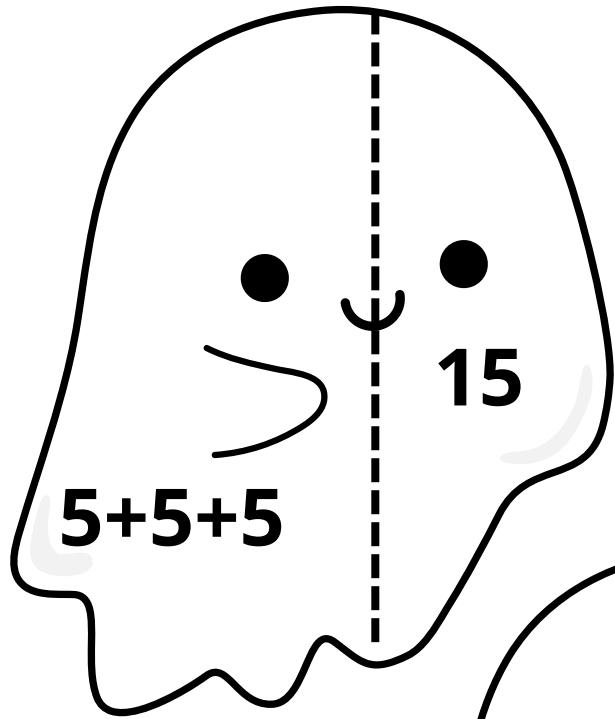

**Je možné hrát na jednotlivce, větší zábava bude ve dvojici nebo skupině.**

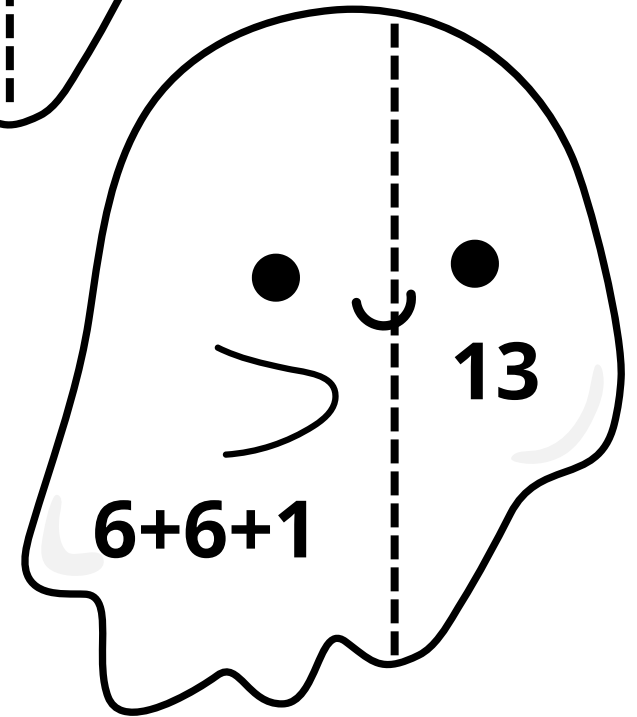

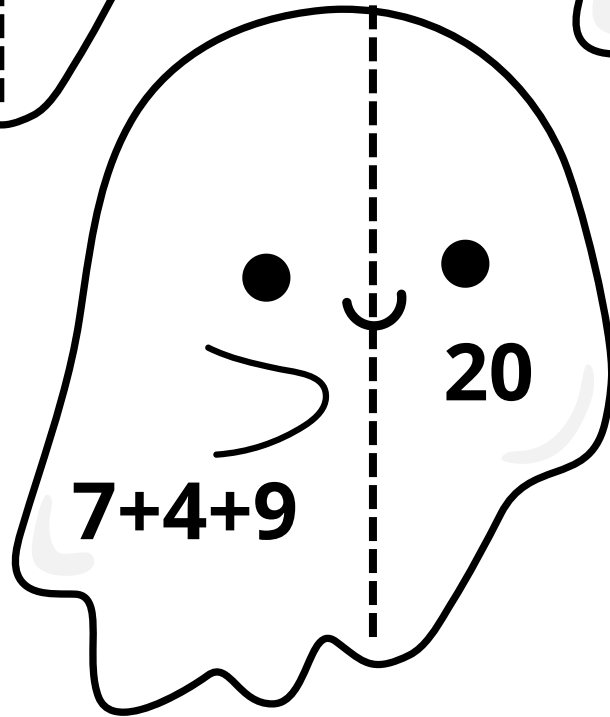

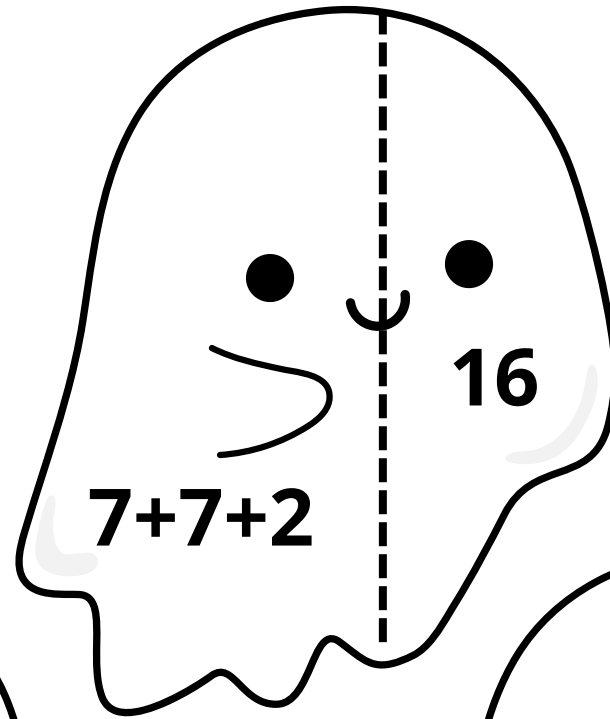

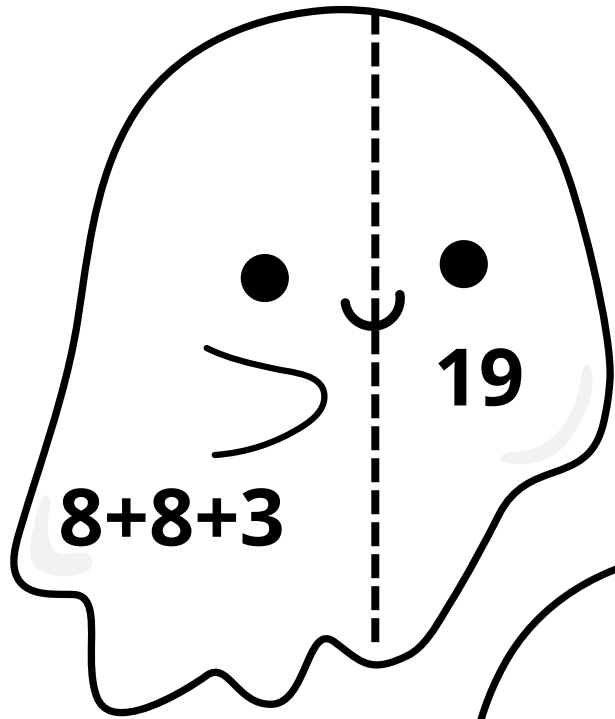

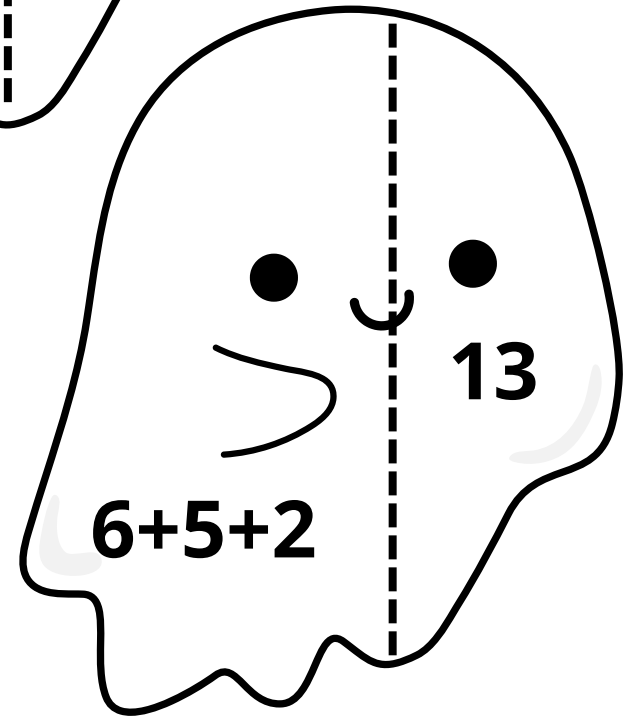

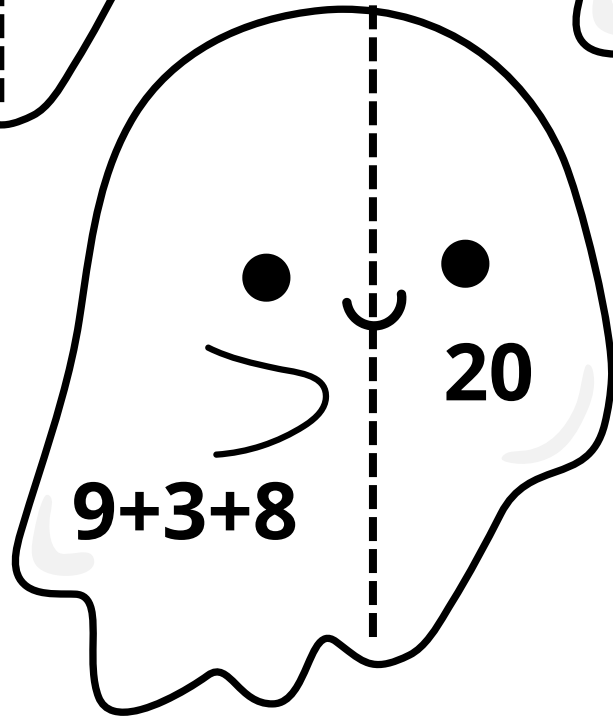

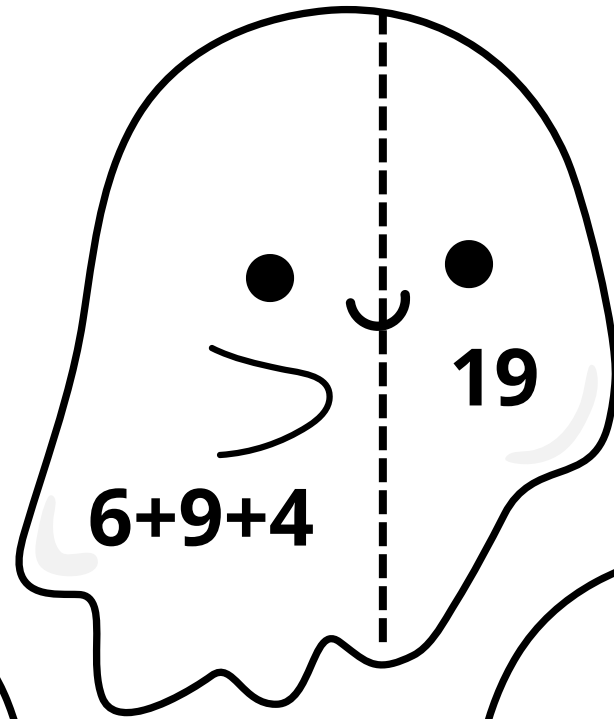

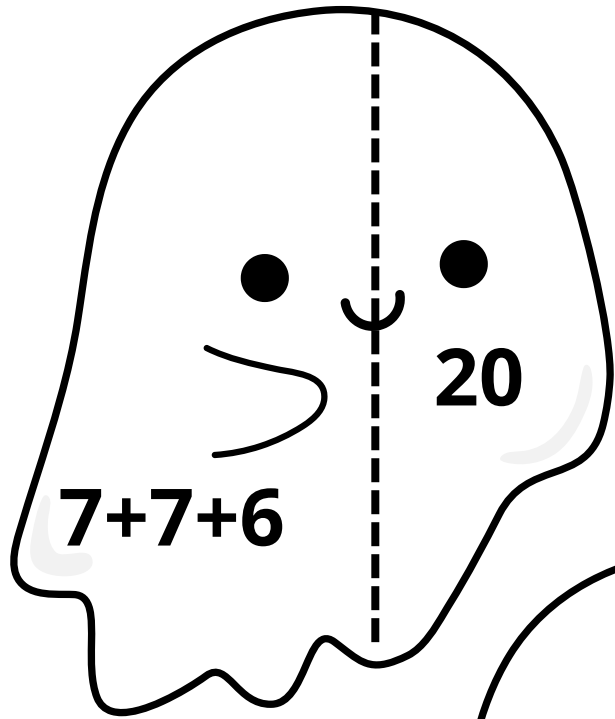

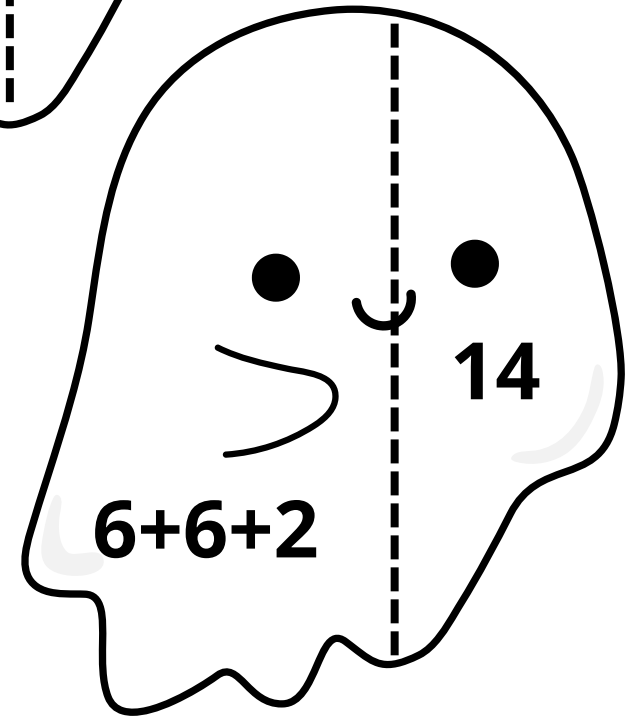

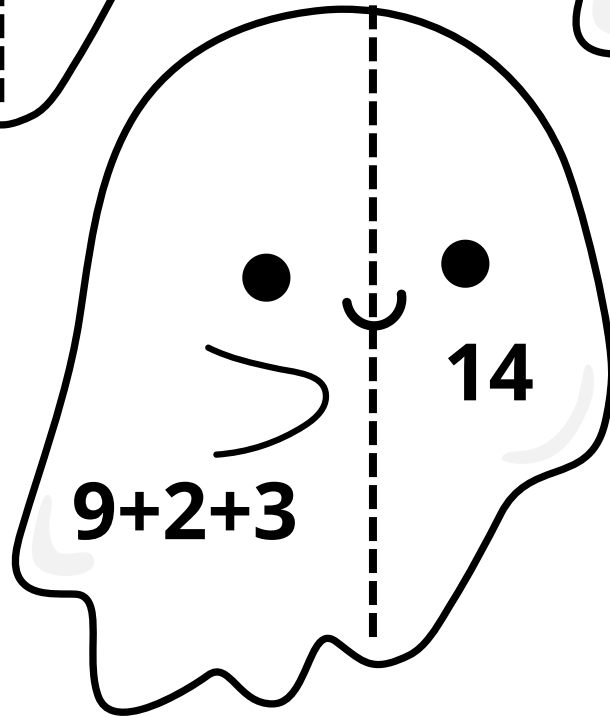

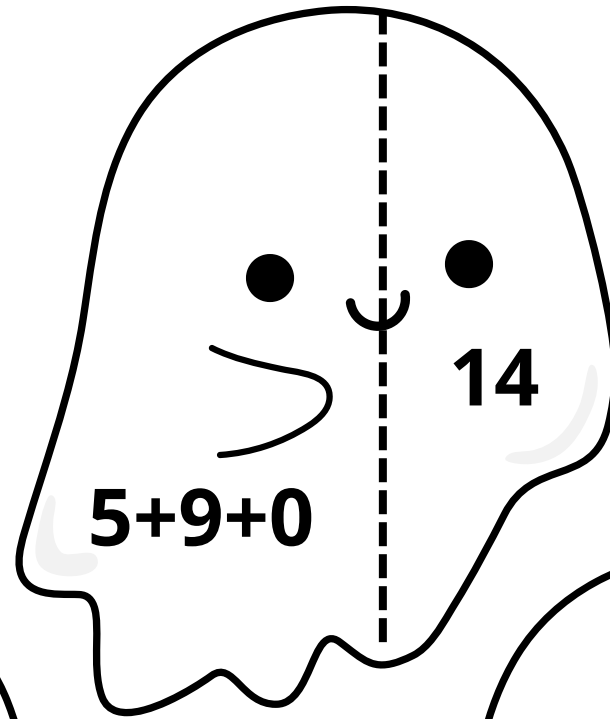

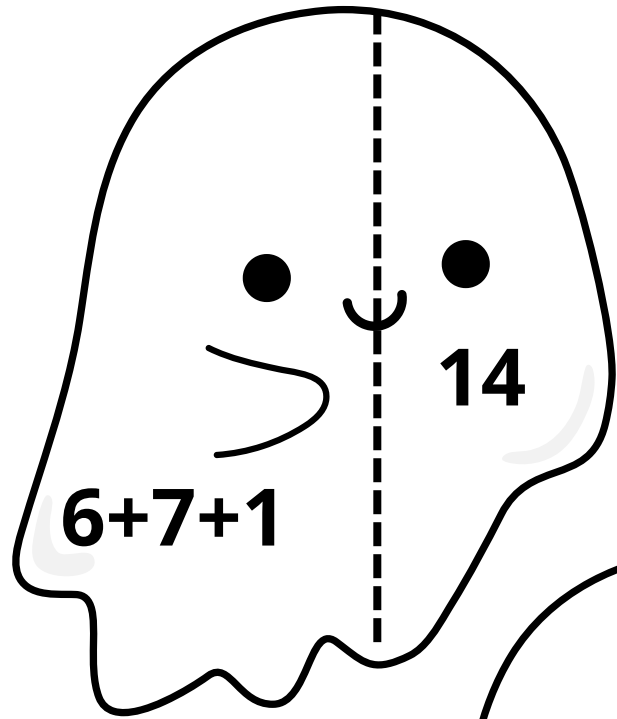

Didaktický materiál pro učitele byl vytvořen v aplikaci Canva, je zdarma a věřím, že se bude žákům líbit.  
Děkuji za stažení a přeji všem úspěšné využití.
