## KOMBINATORIKA

Milí kolegové. Soubor slouží dětem v MŠ (lze použít i pro prvňáčky nebo ve speciálkách) k procvičení počtu v oboru 1-6 a k seznámení se s dovedností práce v tabulce. Budete potřebovat tabulky a krabičky na drobné berušky.

Děti přiřkládají (či lepí) správnou barvu a počet tak, aby bylo smysluplně vypracováno zadání. Některým dětem nebude třeba zadání vysvětlovat. Jiné děti na postup přijdou samy, když si s nimi sednete, naznačíte systém a ony budou "přemýšlet nahlas". Jiným dětem zase bude potřeba práci vysvětlit a ujistit se o tom, že ji pochopily.

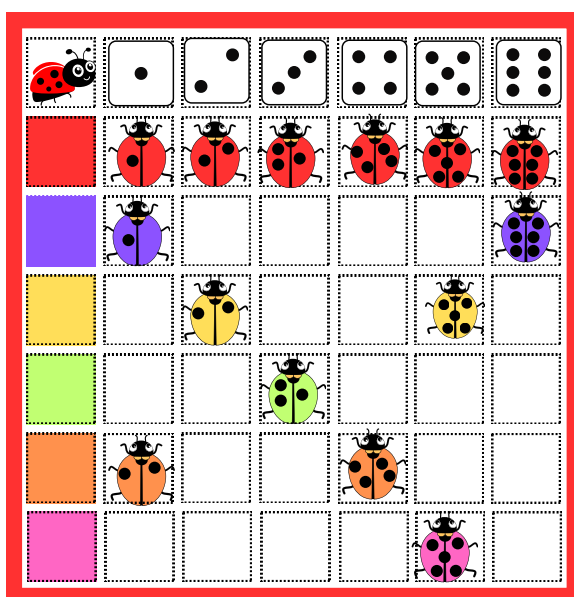

Dva základní typy úkolu:

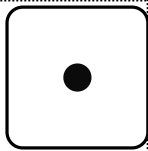

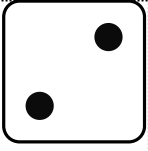

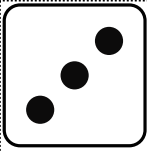

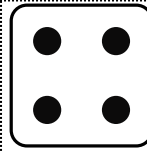

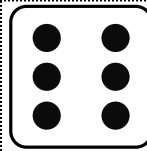

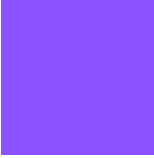

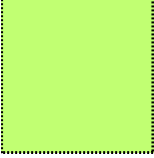

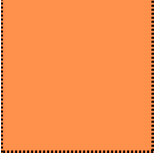

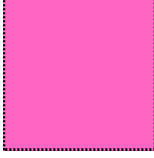

1. Vyplnit celou tabulku.
2. Doplnit do tabulky pouze některé (předem určené) elementy.

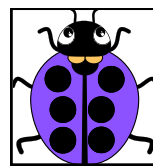

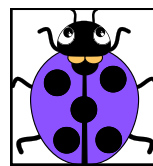

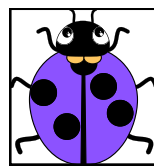

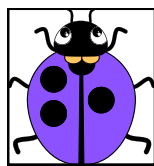

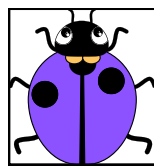

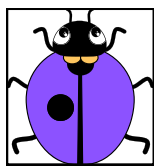

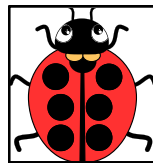

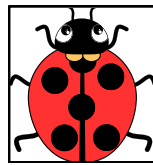

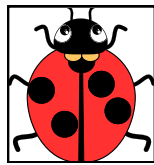

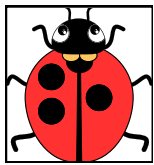

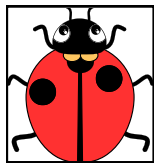

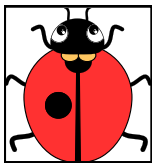

Verze: 3 typy obtížnosti, barevná a černobílá verze.

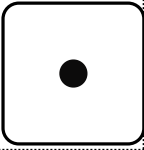

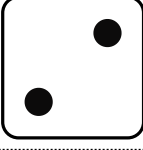

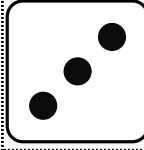

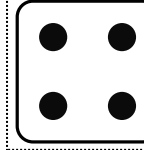

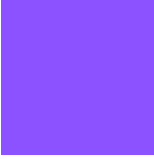

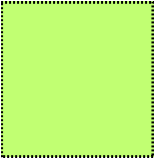

*Podporujeme v dětech samostatnost v myšlení, rozhodování a cílevědomém samostatném vyřešení úkolu.*

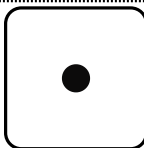

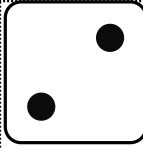

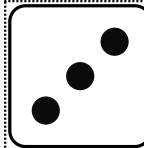

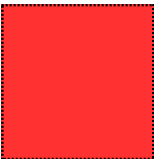

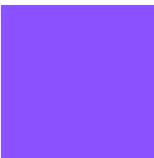

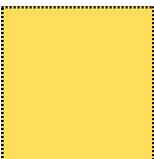

Přeji krásné dny. Hanka

						
						
						
						
						
						
						

				
				
				
				
				

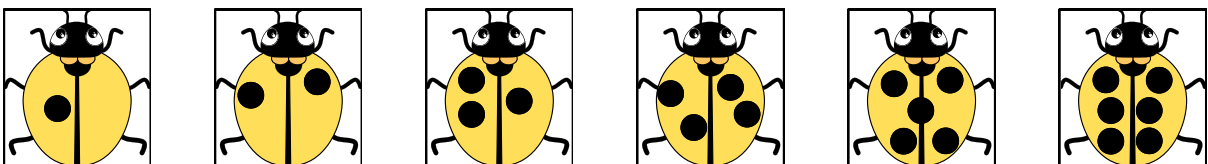

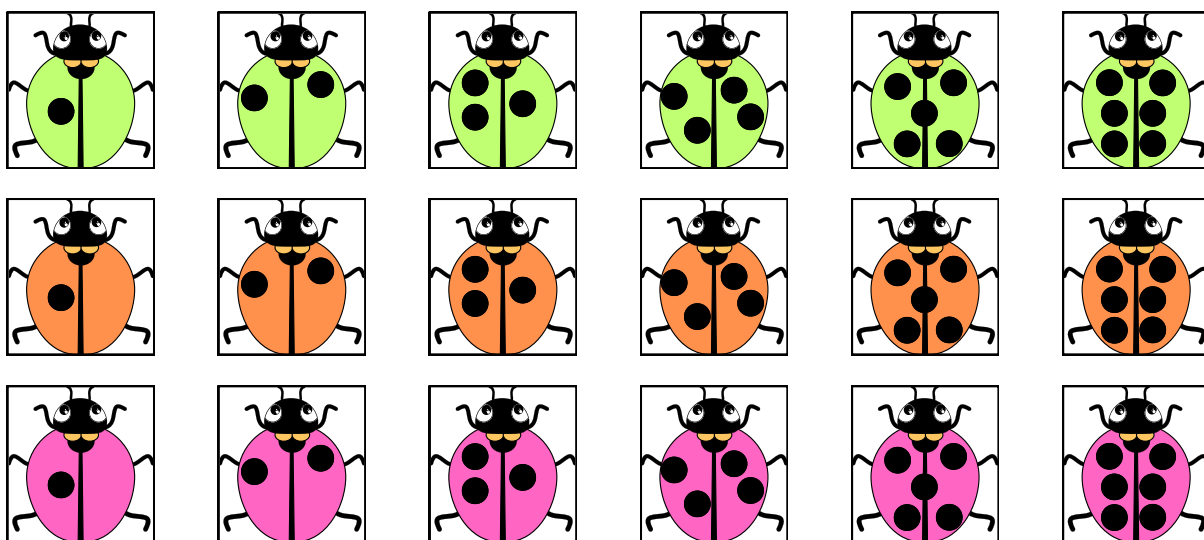

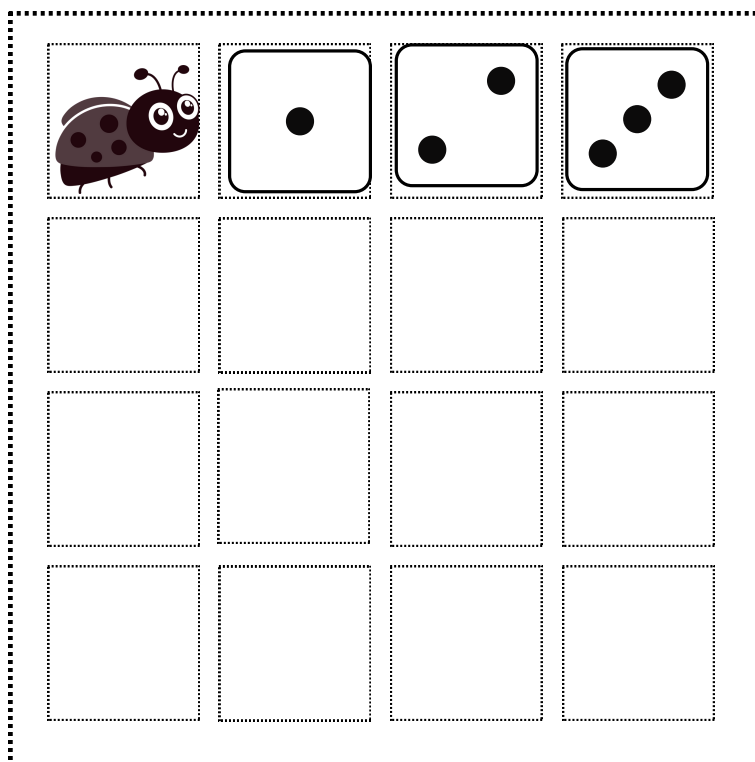

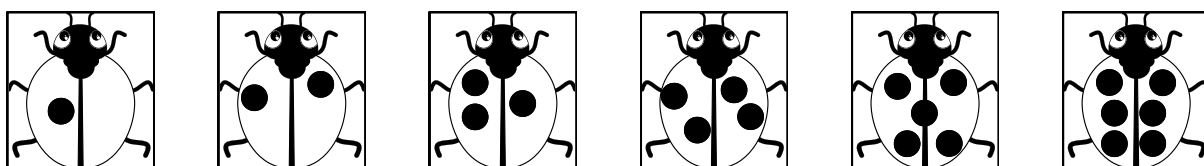

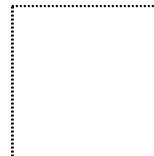

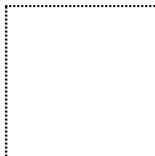

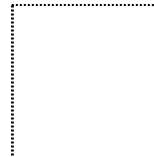

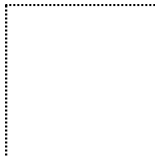

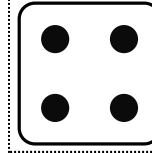

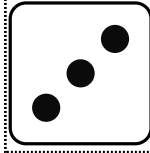

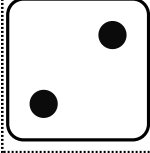

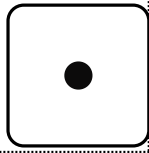

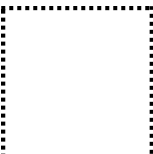

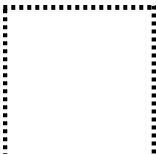

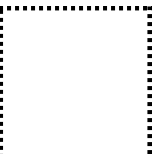

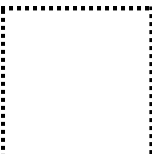

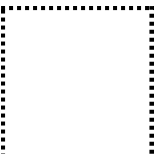

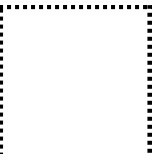

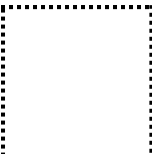

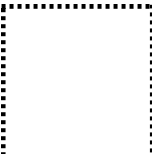

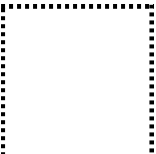

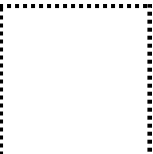

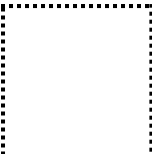

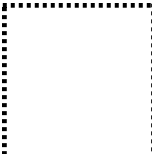

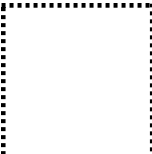

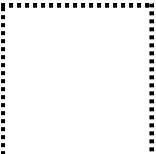

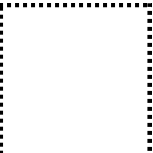

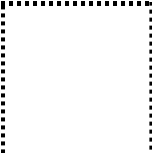

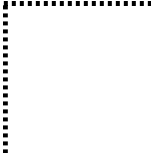

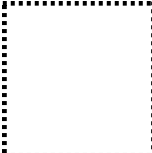

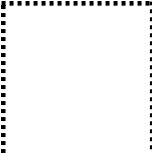

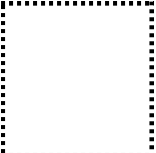

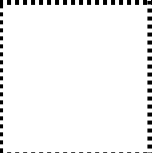

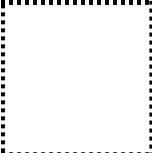

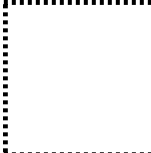

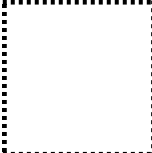

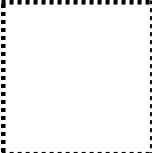

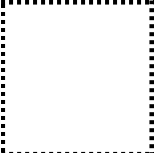

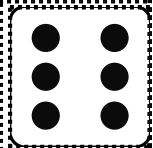

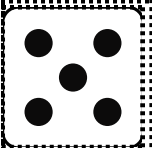

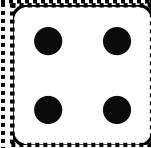

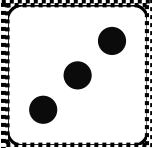

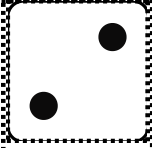

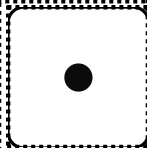

Berušky i tabulky vytisknout v potřebném množství.

Černobílá verze.
