

DÝNĚ V HLAVNÍ ROLI

*Ať se Vám s
materiálem dobře pracuje a
užijete si spoustu zábavy
Vy i žáci!*

VÝZKUMNÝ PROTOKOL

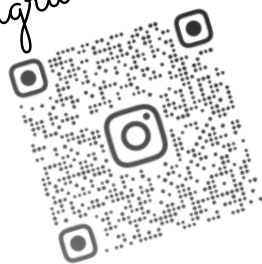

- Barevná a černobílá varianta
- Odhad velikosti v porovnání s ostatními ve třídě.
- Výška dýně měřená za pomoci kostek (např. lego duplo).
- Pokus, zda dýně plave.
- Návrh řezu - např. obličej
- Zakroužkuj nebo vybarvi, co bude potřeba na vydlabání a vyřezání dýně.

Tipy:

Žáci mohou pracovat ve skupinkách nebo jednotlivě, promyslete, co je pro Vaši třídu vhodnější.

Semínka, alespoň některá, doporučuji omýt a nasušit. V příštích dnech je můžete využít k počítání nebo pro tvoření ve VV/VČ.
